DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13, 15, 17, 19, 21, 23, 25, 27, 29 and 31, drawn to a gas detection apparatus incorporating the use of a selective filter, classified in class 422, subclass 83.
- II. Claims 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 33 and 34, drawn to a gas detection apparatus, classified in class 422, subclass 83.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has a separate utility, such as an apparatus requiring the incorporation of a filter for selectively admitting a chemical substance to a detection means. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Yasuo Muramatsu on 6/24/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
